DHEERAJ GOPALKRISHNA

SOFTWARE ENGINEER

Stamp 1G | 3 Years of Experience | Full Stack Developer

Phone: +353 892719980 | **Email:** dheerajgk21@gmail.com | **GitHub:** github.com/DheerajGk21
LinkedIn: linkedin.com/in/dheeraj-g-5b2a561b7/ | **Location:** Dublin, Ireland

Full Stack Developer & MS graduate with 3+ years of experience in developing and deploying scalable web applications. Specializing in frontend and backend technologies, including JavaScript, Java, React.js and Vue.js. Proficient in using modern frameworks, databases, and cloud technologies to design and implement robust applications. Adept in delivering high performance solutions while ensuring excellent user experience and system optimization.

SKILLS

Programming Languages: Java, JavaScript
Frontend: React.js, Redux, Vue.js, Vuetify, Vuex, Pinia, Ajax, Ag-grid, HTML, CSS
Backend: Spring Boot, REST API, Node.js, JSON
Databases: PostgreSQL, MySQL, Webstorage (Local, Session, IndexedDB)
Cloud & DevOps: AWS (S3), Docker, Keycloak, SSO, Authentication, Authorization
Tools: GitHub, Postman, Jira, NPM, Webpack, SonarQube
Methodologies: Agile, Software Design, OOP, Data Structures & Algorithms, Testing, Debugging & Troubleshooting, UX

EXPERIENCE

Software Engineer — **Foundation for Science Innovation and Development (FSID)**
April 2024 – December 2024 (9 months)

- Developed full-fledged web application to manage and categorize high volume metadata of medical datasets for Indian Council of Medical Research using React.js and JavaScript, reducing manual processing.
- Designed microservices based on REST using Spring Boot and Java for core application modules in a distributed architecture used PostgreSQL to manage metadata for S3 bucket objects.
- Built file management module to securely manage and access datasets stored in AWS S3 using Java SDK.
- Worked on JWT and Keycloak for Authentication, Authorization, and Single Sign On (SSO) to enhance security.
- Leveraged AWS SDK for Presign operations and object storage management.
- Utilized Docker for containerization and efficient deployment processes.
- Conducted API testing and validation using Postman.
- Worked in a Linux-based development environment, managing version control and tracking with GitHub.

Software Engineering Specialist — **Dassault Systemes Global Services**
September 2021 – December 2023 (2 years 3 months)

- Developed business web applications for Product Lifecycle Management (PLM) across 6 Procter & Gamble projects.
- Designed Micro frontend architecture apps using React.js, JavaScript, and libraries such as Redux, AgGrid, and Webpack.
- Migrated and upgraded legacy JSP applications to modern stacks such as React.js, microservices, containers and AWS cloud, improving performance and maintainability.
- Worked on storages such as PostgreSQL, MQL and Web Storages (Local, Session, IndexedDB).
- Built scalable and reusable code components, optimizing UI/UX, and business logic integration.
- Created RESTful microservices using Java and Spring Boot, following Configuration-Driven Development (CCD).
- Debugged, analyzed, and resolved application issues, ensuring smooth functionality and performance.
- Incorporated GitHub, SVN, and Jira for version control and Agile project management.
- Employed the most relevant data structures, algorithms, design patterns, and object-oriented principles.

EDUCATION

National College of Ireland, Dublin
Master of Science in Artificial Intelligence — January 2025 – January 2026

Vidya Vikas Institute of Engineering and Technology, Mysore
Bachelor of Engineering in Computer Science — August 2017 – August 2021
Modules: Data Structures, Algorithms, OOPS, Computer Architecture, Java, JavaScript, React.js, SQL, Machine Learning, Git.

ACHIEVEMENTS & CERTIFICATIONS

- Was awarded Applause Annual Awards 2022 for outstanding contributions towards organizational objectives.
- React.js, Vue.js, GitHub, REST API, JavaScript Certifications from LinkedIn Learning.
- Personal Blog-Website: https://dheerajgk21.github.io/
